

# ① LK2000 Set Up.

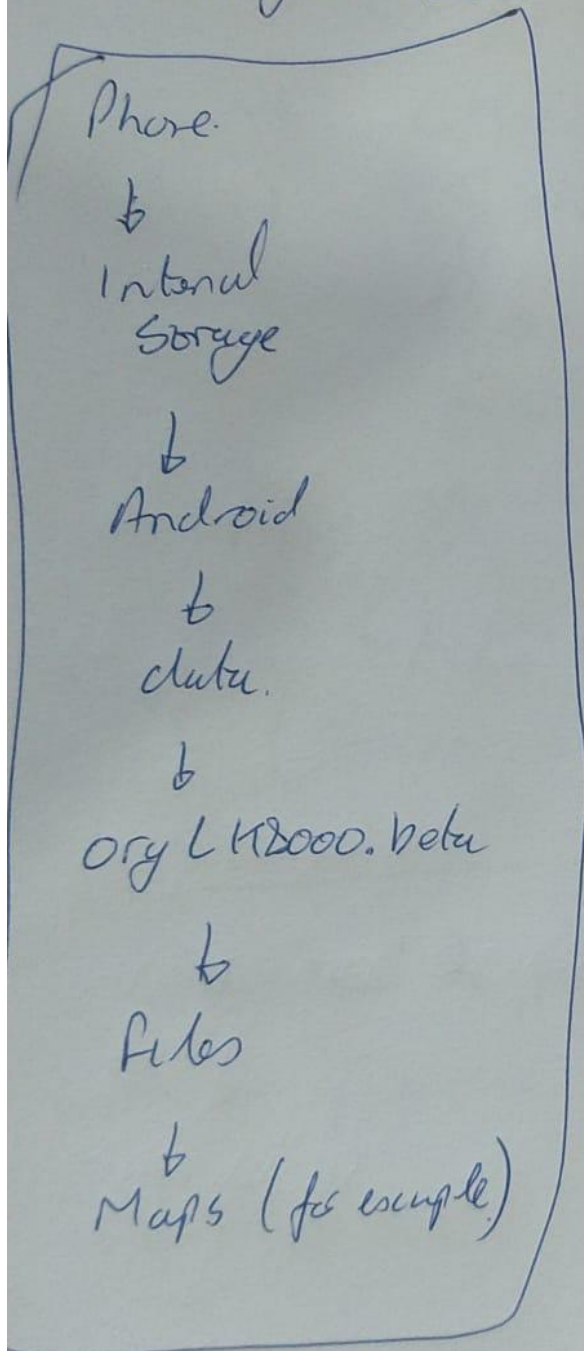

- Since the android upgrade LK2000 is stored in a different place. This is important as the old map, terrain, terrain files do not seem to be copied correctly.
- The correct Map etc files must be located correctly within the LK2000 file structure. LK looks for the files in a particular place which is not obvious, and cannot be changed.
- Connect your phone to the desktop.  
Use the P.C file manager to locate the phones internal storage.

2

## GOTTCHAS

Once you download LK 2000, you will have 2 storage locations, & it is very confusing.

~~OR~~  
AND

Phone.

MAPS

Your data

files need to go in

here!!

Copy + Paste  
from the club website.

③

Once you have the maps etc in the correct location. (They are all on the club website)

- Open LK 8000
  - Config Page 2 of 3 (2/3)
  - LK 8000 Setup.
  - System Setup
  - Page 1 of 23. deals with the basics.

Map file... Select the desired file.

(UKM\_S\_LKM) ?

↳ (Terrain file (UK\_S\_500\_DEM))

---

Waypoint & Arsque files are still a work in progress.
